

Kelba KOCS-L Digital HANGING SCALE

The **Kelba KOCS-L** series of digital Hanging Scales, offers the user a simple and easy method to weigh goods in a lifting / tension application, from 30kg to 300kg capacities.

Comes standard with top stainless steel shackle and stainless steel bottom hook.

Standard 20mm LCD display up to 150 hours of continuous operation makes for easy reading of the displayed weight. With standard Zero, Tare In / Tare Out function, Stable function makes this a very simple to use scale. Or as a replacement of older mechanical dial scales.

The Kelba KOCS-L hanging scale is also able to read weights in **kg, lb & N** as well as converting these from one weigh reading to other while in use. Some other handy features include an overload alarm to warn you if have gone over the capacity of the scale plus a battery indication function to warn you of the current battery power level.

The applications are limitless from Food industry Fishing Industry, Measuring Tension Forces and General Tension weighing at low capacities. (Non trade weighing applications only)
