IWQ Series

Conforms to IP67, Water-resistant / Stainless Steel Scale

IWQ-30

IWQ-150
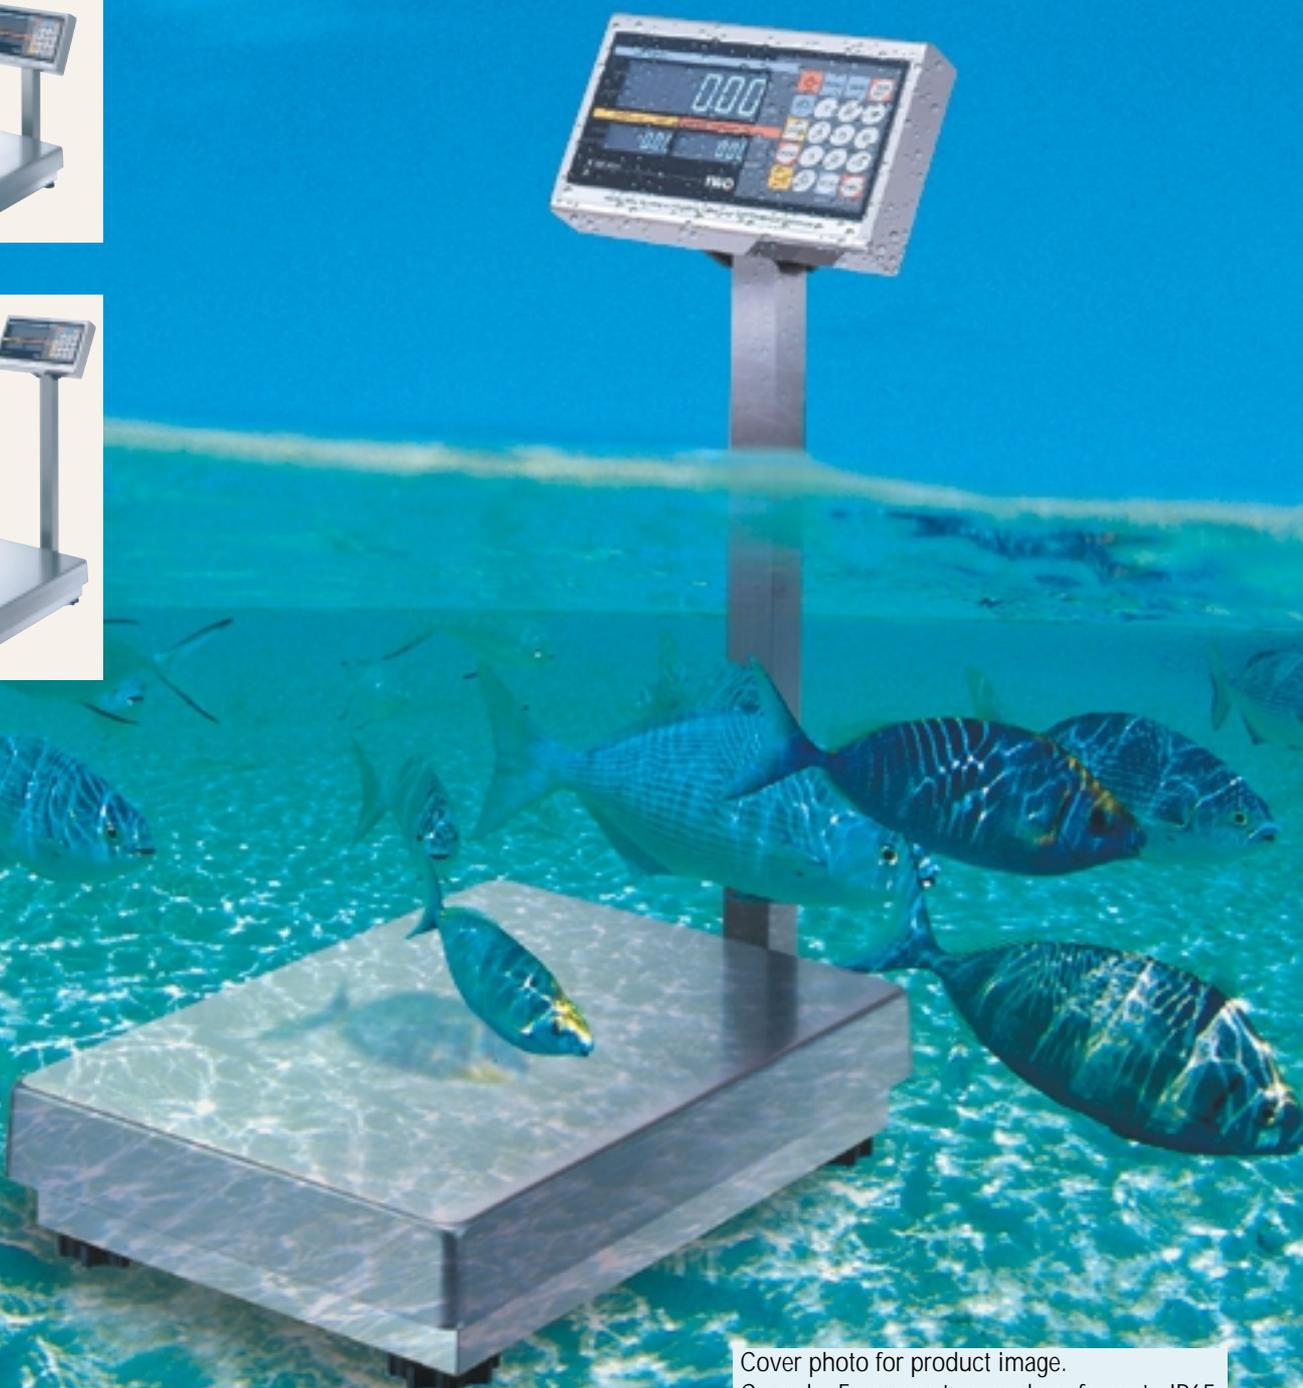

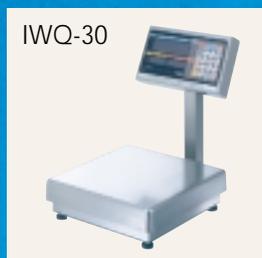

Cover photo for product image.
Console: European type and conforms to IP65.

Ideal for meat and seafood industries
– reliable water-resistant scale even under harsh conditions

● **Water-resistant Scale Made Completely of Stainless Steel, Conforming to IP-67** (Console: IP-65)
Allows washing and water splashing, which realizes easy cleaning and outstanding durability. For the first time in the industry the load cell has been coated with acrylic resin to make it completely waterproof.

● **Autoranging Feature**
Weighing range changes depending on product weight. No need to use several scales for different weighing capacities.

● **Checkweighing Function for Quality Control**
Upper and lower weight limits can be set to check if the product weight is within the specified range. Suitable for controlling the filling quantity of packed food, etc.
* An optional relay allows for interlock with a display lamp or sequencer.

● **Large, Bright Display**
A large fluorescent display provides superior visibility.

European design
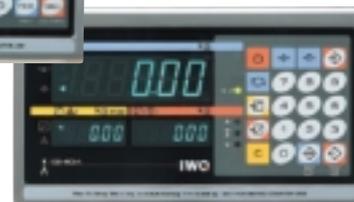

● **Counting Function**
The numeric keypad allows easy operation in counting mode. Single weight and total weight can be displayed at the same time.

● **Relay Output** (Option)
Linking a lamp or sequencer is also possible by the relay output.
