Newly Expanded

The OHAUS Explorer® Series has risen to the next level of ingenuity— expanding on its modern features & design to offer unmatched functionality in a line of high-performance balances unlike any other on the market.

Standard Features Include:

- **Intelligent PERFORMANCE—**All Explorers have newly optimized linearity and repeatability specifications and enhanced vibration filtering for better balance stability. All models also come standard with AutoCal™ automatic internal calibration. 3×3 filtering setup ensures fast and stable weighing results. The Explorer EX…/E models additionally offer traditional external calibration. These combined enhancements improve accuracy, efficiency, and throughput.

- **Intuitive OPERATION—**A large color touch-screen display, icon-driven application software that features 14 unique application modes, and a 3 level adjustable angle display make Explorer the easiest to use, most advanced balance in its class today.

- **Ingenious DESIGN—**The base and display separate for maximum flexibility in any work area. Draftshield models isolate the weighing chamber to enhance stability and speed results while offering maximum accessibility to the weighing chamber through top-mounted side doors or through the versatile top door that flips or slides open. Hands-free entry is available with optional automated side doors.

- **Practical FEATURES—** Explorer has up to four user-programmable touchless sensors to minimize cross contamination and wear and tear normally associated with repeated touching of the balance. The Explorer EX…M Models have been designed and verified to meet or exceed the Class I and II accuracy requirements in accordance with EC Directives and EN45501.

Intelligent.
Intuitive.
Ingeniously Practical.

www.OhausExplorer.com

The OHAUS Explorer® has risen to the next level of ingenuity—expanding its features, design, and capabilities.

Intelligent PERFORMANCE

With stabilization times up to 50% faster and superior shock protection, Explorer delivers fast, accurate, and reliable results.

- Fast stabilization time
  - —Improves operational efficiency
  - —Increases throughput
  - —Improves productivity

- Optimized linearity and repeatability specifications
  - —Provides accurate and repeatable results

- Optimized vibration filtering
  - —Provides balance stability in unstable environments

- Superior Shock, Spill and Splash Resistance
  - —2-D Protection guards balance against disruptions in service due to shock or sudden movements. IP54 base enclosure protects the weighing base from damage by debris, humidity and accidental spills and splashes.*

*High Capacity Models Only

Intuitive SOFTWARE

SmarText™ 2.0 is OHAUS' easy-to-use graphical software featuring 14 applications, virtual QWERTY and numeric keypads, and below-minimum weight indication.

- Color VGA display with icons for simple menu navigation
  - —High resolution, 145 mm color 640 × 480 pixel display reproduces highly readable operating software
  - —Resistive touch screen display quickly responds to operator's touch or stylus

- 14 built-in applications with customization capabilities to meet the varying needs in laboratory and industrial settings

- Minimum Weight capability with visual warning feature

- Virtual QWERTY keyboard and numeric keypad to quickly input GLP and GMP data and other application data

- User Manager with administrator capability

- Library function to store and recall customized applications

- Alternate RS232 command feature adapts the balance to existing data acquisition software

- External input for zero, tare or print operations via the external foot switch accessory

- Audible and visual feedback for touch screen input commands as well as the indication of the check weighing status

The expanded OHAUS Explorer® provides unmatched functionality in a line of high-performance balances unlike any other on the market!

Ingenious DRAFTSHIELD

Explorer's draftshield provides ample access and visibility to the weighing chamber through the versatile top door and side sliding doors. Select models feature motorized side doors that open and close automatically with use of the touchless sensors on the base and display.

• The automatic draftshield door model has a new function for automatically opening draftshield doors without touching the balance. It helps to eliminate sample residue transfer and contaminations.

• Side doors seamlessly glide on top-mounted bearings

• The versatile top door offers two entry options; access the weighing chamber by flipping the top door or sliding the glass panel open.

• The expansive side entry (160 mm × 240 mm) allows you to freely place and remove large weigh boats or other large vessels in the weighing chamber

• Antistatic coated glass helps dissipate static charges in the weighing chamber which could adversely affect the weighing results

• Easy to install and remove glass panels and a stainless steel bottom make Explorer extremely easy to clean

• A draftshield chamber light is available when the balance is used in low lighting environments

Practical TOUCHLESS SENSORS

Explorer features up to four touchless sensors for hands-free operation of print, calibration, tare, automated draftshield doors and other selectable functions

• Hands-free operation
  —Improves weighing efficiency
  —Eliminates sample residue transfer
  —Minimizes contamination

• Two sensors on the base* and two on the display can be set up individually to allow for remote operations

• The sensors can be set up to provide automated operation of the draftshield side doors and can be programmed to automatically open the opposite side door in order to support efficient and logical sample placement with your free hand.

*Analytical and precision models only.
 Automatic Draftshield door operation only offered on Analytical models

The expanded Explorer® is the most intelligent and intuitive balance ever to come from the mind of OHAUS!

Intelligent CALIBRATION

AutoCal™ ensures performance and assists with routine maintenance by automatically calibrating the balance daily.

- Fully-automatic internal calibration system
- No need for external masses
- Eliminates cost to maintain external weights
- Self-calibrates the system when it senses a temperature change sufficient enough to affect weighing accuracy, or every 11 hours
- External Calibration Models Available
  —Select precision models feature traditional external calibration in which external weights (user's choice of calibration weight values) are used to calibrate the balance to ensure accuracy

Intuitive USER SETUP

Explorer is the industry's most easy-to-use balance, featuring leveling assistance and instructional messaging for quick out-of-the-box setup and use.

- Easy to view illuminated level indicator placed at the front of the balance
- Adjustable thumbwheels are easy to turn to level the balance
- Level assist screen helps users quickly identify which thumbwheels need to be adjusted to level the balance
- Data Transfer Function helps to output data directly into Microsoft Excel
- Instructional messaging during application use guides users through the weighing process
- User information menu allows users quickly view and learn more about the available balances features
- Up to 13 operating languages make Explorer's Intuitive User Setup truly universal

The Explorer® is a revolutionary shift in the way users interact and operate a weighing instrument, all based on our ingeniously practical design philosophy.

Ingenious MODULAR DESIGN

Explorer's modular design features a color touch display that can be separated from the weighing base

- Display features:
  - —Three position, angular adjustment to optimize viewing
  - —Easy access communication ports include standard USB and RS232 and an optional third port of either RS232 or Ethernet
  - —Left and right side cable exit feature for customized installation capability
  - —Tower and wall mount ready for modular installation*
  - —In-use cover for protection against rugged use
  - —Extension cable accessory extends remote use up to 3 meters

- Base features
  - —Quadrastance™ design with four adjustable thumbwheels provides superior stability
  - —Robust die-cast metal bottom housing
  - —Accessory tower mount ready for modular installation
  - —Cable storage system

- Adjustable rolling feet accessory allows for simple and quick movement and relocation of the balance**

*Tower mount sold separately
**High capacity models only

Practical APPROVALS

Explorer EX…M Models are designed and engineered to meet stringent OIML and NAWI Directive (Non Automatic Weighing Instruments) requirements for use in legal and prescribed applications such as in pharmaceutical laboratories, jewelry stores or QC laboratories. OHAUS Explorer also features NTEP Type approved models. The Explorer EX…M Models have been designed and verified to meet or exceed the Class I and II accuracy requirements in accordance with EC Directives and EN45501.

Other Standard Features & Equipment:

Menu lock switch, security bracket, integral weigh below hook for below balance weighing applications, removable stainless steel weighing pan, stability indicator, overload and underload indicators, auto standby.

OHAUS EXPLORER® Application Software

The OHAUS Explorer's advanced applications simplify even the most complex laboratory measurements. Whether it's determining the difference between initial and residual weights or calculating the density of solids and liquids, Explorer eliminates the need for time consuming manual calculations and data logging. The high resolution display and innovative user interface make balance setup and application use effortless.

Displays your current application. One-touch drop down menu shows additional application choices

Touch to change your application settings

Quickly store and recall your library data of regularly used items

Need help? Just tap the Info button for built-in assistance

Easy-to-follow text prompts tell you what to do next

Battery life indicator when powered by optional battery pack (for High Capacity models only)

Large weigh results can be viewed at any angle

Press the weighing unit to change the unit of measure (activate in Weighing Units menu)

Results area shows pertinent application information (varies by application)

Fill and capacity bar indicators assure you are always in range (indicators vary by application)

Seven quick keys make balance operation a breeze!

Soft keys are application specific

Press Menu to choose applications, change user settings, balance setup and much more!

Standard Apps

Weighing
Determine weight of items in the selected unit of measure. Minimum Weight feature is also available.

Percent Weighing
Measure the weight of a sample displayed as a percentage of a pre-established Reference Weight.

Dynamic Weighing
Weigh an unstable load. Balance takes an average of weights over a time period.

Totalization
Measure cumulative weight of multiple items. Cumulative total may exceed balance capacity.

Differential Weighing
Store sample weights and calculate the difference between initial weights.

Peak Hold
Capture and store highest weight in a series. Both stable and unstable weights are captured.

Parts Counting
Count samples of uniform weight. Choose Standard Counting, Check Counting, or Fill Counting.

Pipette Adjustment
Check pipette values by weight analysis, with built-in water density table. (Non High Capacity Models)

Check Weighing
Compare the weight of a sample against target limits. Choose from Standard, Nominal-weight, or Nominal-Percent.

Filling
Fill a container to a target weight. Progress bar displays filling status.

Formulation
For compounding and recipe making. The number of components can be from two to 99.

Density Determination
Determine density of solids more dense than water, solids less dense than water, liquids, or porous material.
Ingredient Costing
Determine cost of formula or recipe based on known cost/quantity of components or ingredients.

SQC
Monitor and/or control processes to eliminate under and over filling.

OHAUS EXPLORER® High Capacity

The Explorer series includes three high-capacity precision models with capacities up to 35 kg. Explorer high-capacity balances offer the same intuitive features, such as AutoCal™ and a 1 second stabilization time, with additional functions and attributes to support higher capacity weighing applications.

Modular Design

• 145mm color VGA touch screen optimizes viewing and menu navigation

• Two touchless sensors on display offer hands-free operation

• The display can be separated from the base up to 1.5 meters in order to fit operational needs in almost any workspace. A 3 meter cable is also available when additional flexibility is needed.

Superior protection in rugged or unstable environments

• With a die-cast metal base and a 377 × 311 mm stainless steel pan, the Explorer High Capacity is built to withstand rugged, every day use.

• 2-D Protection prevents shock and damage associated with movement and forces applied to the balance

• IP54 base enclosure protects the weighing base from damage by debris, humidity and accidental spills and splashes. (High Capacity models only)

High Capacity Accessories for Added Efficiency

• Adjustable rolling feet provide assistance in easily moving the balance

• Rechargeable battery option provides 10 hours of operation away from a power source
